

The Ultimate Pine Garden Studio Project Checklist

Phase 1: Planning & Preparation

- Define the primary use (Office, Gym, Studio?).
- Set a total project budget (kit + foundation + electrical + finishes).
- Measure your backyard space to determine the maximum size.
- Research local planning permissions and permit requirements.
- Choose a design style (Modern, Traditional, etc.).
- Select the exact location, considering sunlight, views, and distance from the house.
- Get quotes for electrical installation from a certified electrician.

Phase 2: The Foundation

- Choose foundation type (Concrete Slab, Pavers, Deck Blocks).
- Purchase all necessary foundation materials.
- Clear and level the ground for the foundation.
- Build the foundation, ensuring it is perfectly level and square.
- Allow adequate time for concrete to cure if applicable.

Phase 3: The Build (for DIY Kits)

- Unpack the kit and verify all parts are present using the checklist.
- Organize all components for easy access.
- Gather all necessary tools (drill, level, ladder, etc.).
- Assemble the floor frame and secure it to the foundation.
- Erect the wall panels according to the instructions (requires a helper).
- Install the roof structure and covering materials.
- Fit and seal all windows and doors.

Phase 4: Finishing & Furnishing

- Complete electrical wiring and install fixtures (professional work).
- Install insulation in the floor, walls, and ceiling.
- Install interior walls (drywall, wood panels) and flooring.
- Paint or stain the interior and exterior surfaces.
- Set up internet connectivity (Ethernet or Wi-Fi extender).
- Install heating and/or cooling unit.
- Furnish the space with a desk, chair, storage, and decor.
